Rising price of bread and other food items

Pristina, December 20 2010 - These days we have price increases and many other foodstuffs. BSPK expresses its concern and reacts sharply to this phenomenon which directly affect population of Kosovo, especially those which lives in extreme poverty. Price increase of these standard endangers more than 70% of the population. BSPK requires the Kosovo government to intervene with the necessary tools so that the price of bread not to rise and become unaffordable for most workers and citizens of Kosovo. While considered that price increases of bread is irresistible, bakers justify this action by increasing the price of wheat and flour in the world market. BSPK also requires the Government of Kosovo through various incentives to help bakers and those that make the supply of flour in order to maintain control over the price rise of this article. Otherwise strikes will be held.
